

Geography

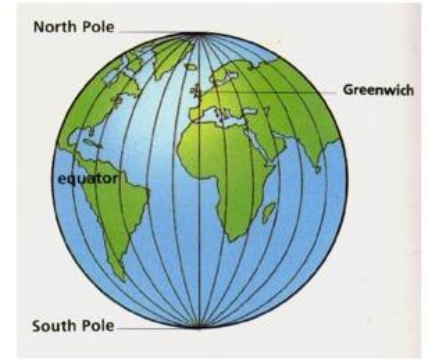

The world is divided into two parts by the **equator**.

Lines of Latitude

Lines of Longitude

These parts are called the Southern Hemisphere and Northern Hemisphere.

latitude

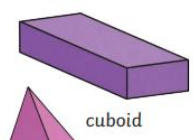

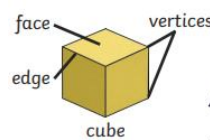

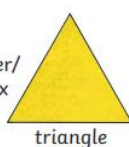

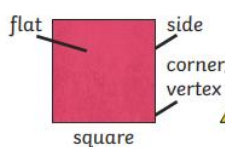

longitude

Vocabulary

Word	Definition	Picture
transition	The process of passing from one stage to another. <i>In July, we will begin our transition to year 4.</i>	
equator	The imaginary line around the middle of the Earth. <i>The equator divides the Earth into a Northern and Southern Hemisphere.</i>	
coordination	The working together of different muscles to carry out a complicated movement. <i>Athletes usually have good coordination.</i>	
reflection	The return of light from a surface. <i>An image produced in a mirror like item is called a reflection.</i>	

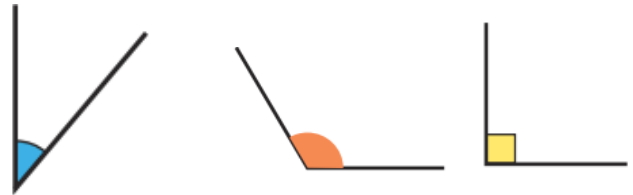

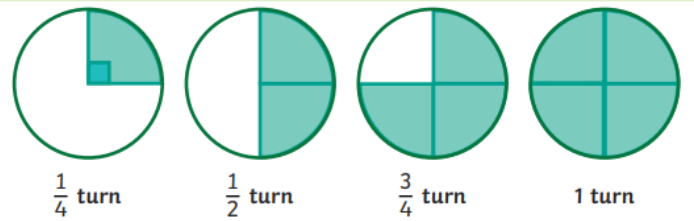

Maths

shape

An angle is created when two straight lines meet at a point or intersect.

- acute angle** less than 90°
- obtuse angle** more than 90°
- right angle** an angle of 90°

recorder

Learning Destination

We will be using shadow puppets to perform classic fairytales with a twist.

Science

We need light to be able to see things. It can be reflected from surfaces.

Shadows are created when light is blocked by an opaque object.
